

The image shows several long, narrow planks of SPC flooring laid out on a grey surface. The planks are arranged in a staggered pattern, with some in a light grey color and others in a light brown color. The wood grain pattern is clearly visible on the surface of the planks. The text "SPC FLOORING INTRODUCTION" is centered over the middle of the image in a bold, black, serif font.

SPC FLOORING INTRODUCTION

What is SPC flooring?

- SPC stands for Stone Plastic Composite, a composite of limestone powder (CaCO_3) and PVC resin.
- SPC flooring is a type of vinyl flooring with rigid core, Vinyl wear layer (WL), underlayment (total 5 layers).

SPC flooring product is more durable but also quite flexible, easy-to-install and water-proof like the vinyl cousins.

SPC flooring advantages

- **Good durability:** 20 years to lifetime durable for residential and more than 5 years for commercial floor.
- **Easy to prepare and install.**
- **100% Water-proof, good stability** to temperature and humidity.
- **High variety** of designs, patterns.
